

HOW TO CHOOSE YOUR DOORS

STEP 1

Choose your preferred door style

Browse through and select your favourite door designs, colours and finishes. Not forgetting, a matching glazed partner, should you wish to add some extra light. Take inspiration from our Gallery of lifestyle images online at jbkind.com

STEP 2

Check the sizes available

If one of our standard door sizes does not fit your requirements, check if a special size can be ordered through our **BS** Bespoke Options service, page 8.

STEP 3

Consider how the doors will be fitted

- Do you need any door pairs? If so, take a look at our Door Pair rebating service page 11.
- Would a Pocket Door System help create some extra space? Ideal for renovation and new build projects, see pages 12-15.
- Will you require any fire doors? Virtually all of our door designs offer an FD30 fire door option. See page 122.
- A pre-hung Doorset complete with frame and ironmongery could be better suited to your project. If so, see pages 10-11.
- Ensuites, wardrobes and cupboards often require a space saving solution. Consider a matching bi-fold option, pocket door system or invest in some sliding door tracking.

STEP 4

Pick the right handle

A stylish handle really does finish off a door. Take a look at our Door Handle Packs, pages 112-113, supplied with everything you need to fit a door.

STEP 5

Price up your doors

JB Kind's doors can be purchased through Builders Merchants and Door Retailer partners across the UK, any of which will be happy to provide a quote.

Either call us on 01283 554197 for details of your local supplier or visit our online Supplier Locator at jbkind.com. Alternatively you can Buy Online via one of our approved Online Partners and your doors will just be a click away.

Measuring up

To make sure you purchase the right door sizes, take the following measurements.

Door width: measure the top, middle and bottom of the door frame. The widest measurement determines the width of the door.

Door height: measure inside the vertical side of the frame. The longest length determines the height required. Remember to make allowance for any floor covering.

NB. You can plane door edges slightly to reduce the size. If required, please call us for details of the lipping size.

Door size conversion chart: A little help if you need to work out the metric and imperial equivalent for door sizes.
